The Good Shopping Guide, a website promoting Ethical Shopping and Ethical Business, has recently named our partner Good Energy the most ethical energy provider in the United Kingdom in 2016.

The Good Shopping Guide, a website promoting Ethical Shopping and Ethical Business, has recently named our partner Good Energy the most ethical energy provider in the United Kingdom in 2016.

The ranking compares the activities of several companies operating in the energy sector. Good Energy received top ratings in all the categories, scoring the highest rank.

Good Energy gets all its electricity from renewable sources and supports more than 800 independent generators across Britain. Together with other members of the BestRES project including renewable energy aggregators (EDP – Energias de Portugal, Next Kraftwerke Belgium, Next Kraftwerke Germany and Oekostrom) and the research centre for sustainable energy of the University of Cyprus (FOSS), Good Energy will implement and test innovative business models developed for each of the target countries by the project.
